## WAYS OF COOKING CABBAGE.

Succulent Vegetable Need Not Always Be Served Boiled.

Although cabbage has often been called the poor man's vegetable, many appetizing and attractive dishes can be made from it. We give several good recipes:

An unusually good salad was recently served at a luncheon. The inside of a good-sized cabbage was cut out, and the space filled with a mixture of chopped celery, cucumbers and peppers dressed with oil and vinegar, and well seasoned. The top of the cabbage was replaced after the filling was put in, and the head was then placed on a plate in front of the hostess, who did the serving. The guests wondered if they beheld another mysterious Jack Horner pie.

Another way to use a head of cabbage is to follow the same plan, only filling the hole with finely chopped meat, a little onion, and bread crumbs. Bake until tender and then cut in slices and serve with a cream sauce. This makes a very good luncheon dish or an entree at dinner.

Fried cabbage is particularly good at this time of year. First boil the cabbage until tender, and when cold cut into small pieces. Cut some slices of bacon into strips and put them in the frying pan. When they have commenced to cook, and the bottom of the pan is well greased, add the cabbage and fry until a light brown. Season with salt and pepper.

For creamed cabbage, boil the cabbage tender, drain off the water and put into the pot with a large teaspoonful of flour, a tablespoonful of butter, a little salt, and half a cupful of milk. Cook, stirring, until the sauce is smooth.

## HOW TO WASH A SWEATER.

Garment Can Be Cleaned Without Causing Loss of Shape.

In summer a girl's sweater is her most important as well as her most useful garment. If her shirt waists are badly made or shoes shabby that is a minor consideration, but her sweater must be immaculate and up to date. Every girl likes to wear nothing but white during the outing season, and great is her disgust when her mother insists upon her having a gray sweater for economy's sake in the firm belief that the darker shade keeps clean longer and that all woolen goods are impossible to wash.

If proper care is taken sweaters can be washed all the time without hurting their shade and color. Fill a large bowl or basin with warm water and soap, add a teaspoonful of powdered borax to keep the wool from becoming hard and stiff. If the sweater is white put a little blueing in the water every time it is rinsed. This will prevent it from turning a deep

ivory, as all white wool materials are apt to do.

After washing wring out, then pin to a large bed pillow. Be sure not to stretch the sweater or it will lose its shape.

## Cake for Small Family.

To make a layer cake, bake one good layer, cut it in either halves or thirds, lay one piece on top of the other, and proceed to frost or ice as usual.

If variety is wanted, take the usual amount of material for an ordinary cake. Divide batter in four parts.

One part may be baked as a marble cake, after dividing it into three parts add one-half cake grated chocolate, to one-third leave plain and add two teaspoons strawberry flavoring to the last third. Pour a little of each in a pan until all is gone and you have a fine marble cake.

One-half pound chopped nuts added to the second part will make a nut cake. One-half cup each of chopped dates and nuts, one-quarter cup each of chopped figs, citron and raisins, one-half teaspoon each of grated nutmeg, cinnamon and cloves will make a fine fruit cake.

The last fourth will make a nice loaf cake.

## Lacquered Brass.

Lacquered brass must not be allowed to get black, but should be cared for in the beginning while it is still new and bright, and thus insure a longer and brighter existence for it. It should be washed occasionally with slightly warm, soapy water, then dried with a soft cloth and polished with a clean, dry cambric leather.

In damp weather the lacquered brass should be well rubbed every day with a clean, dry leather. Treated in this way the lacquer can be kept beautifully bright.

## Making Jars Airtight.

Many housekeepers have trouble with keeping airtight anything that is put up in jars.

If, however, after a jar or bottle is corked it is sealed with a mixture of beeswax and rosin there is no danger of air getting at it.

To make this sealing mixture put two ounces of yellow beeswax and four ounces of rosin in a small tin pan, which is then set in a larger pan of hot water. Stir constantly until the wax and rosin are well blended. Apply while still liquid to the outside of the corked jar or bottle.

## Turnip Salad.

Pare and cut in dice four medium sized turnips; boil in salted water until tender, changing the water several times. Drain in colander and when cool add one cupful of rich mayonnaise. Serve on lettuce leaves.

## Apricot Sauce.

Use one pound of evaporated apples, one-fourth pound of dried apricots, stew together, stirring while boiling, to mix and prevent burning.
